

**Engineering What's Next  
in Outdoor Living™**

# The Trex Messaging

# Trex vs Wood

## A Deck That Lasts

While wood decks often call it quits around the 15-year mark, Trex is built differently. Performance-engineered for the long haul, Trex decking comes with warranties ranging from 25 to 50 years, depending on your product line.

## Color that Won't Fade

Trex decking keeps its vibrant color year after year, no touch-ups required. Unlike wood, which fades in just a year or two and needs constant refinishing, Trex is made to look stunning for the long haul.

## Cooler, Comfortable Days

Select Trex colors feature SunComfortable™ heat-mitigating technology\*, designed to reflect more of the sun's rays and stay cooler to the touch on the hottest days.

## Safe & Splinter-Free

Trex decking won't rot, crack or splinter, giving you a smooth, safe surface that lasts for years. Wood decking can't say the same.

## Advantages of using Trex

## Eco-Friendly Living

Trex decking is crafted from up to 95% recycled and reclaimed materials, providing an eco-friendly choice.

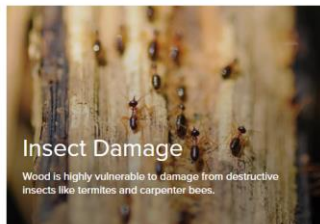

## More Free Time

Trex deck owners spend less than an hour per year on upkeep, while wood deck owners often dedicate an entire weekend annually to sanding, staining, and sealing.

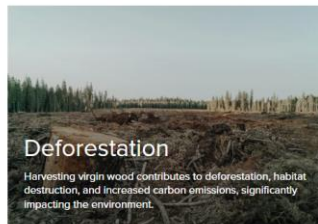

## Savings That Add Up

While the upfront cost of wood may seem lower, over 50 years—Trex's top warranty length—on average, a wood deck costs 40% more in maintenance due to frequent repairs, sanding, and staining.

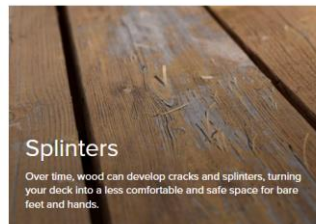

## Insect Damage

Wood is highly vulnerable to damage from destructive insects like termites and carpenter bees.

## Deforestation

Harvesting virgin wood contributes to deforestation, habitat destruction, and increased carbon emissions, significantly impacting the environment.

## Splinters

Over time, wood can develop cracks and splinters, turning your deck into a less comfortable and safe space for bare feet and hands.

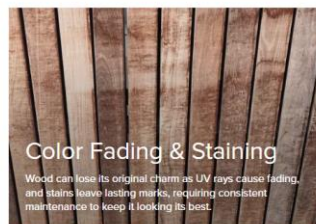

## Tough Clean Up

Spills on wood don't just stay on the surface—they tend to seep in. Cleaning often requires extra effort, like scrubbing, sanding, or refinishing, to restore its appearance.

## Rotting

Moisture and wood aren't the best combination. Over time, exposure to rain and humidity can lead to rot, compromising the deck's strength and durability.

## Color Fading & Staining

Wood can lose its original charm as UV rays cause fading, and stains leave lasting marks, requiring consistent maintenance to keep it looking its best.

## Downsides of wood

# Eco Friendly, Recycled Plastic Decking

## Always Green – Trex Recycling

### Reclaimed Wood

- Locally sourced reclaimed lumber
- Reclaimed sawdust
- No need to cut down a tree

### Recycled Plastic Film

- Trex Recycled Plastic Film
- Ranging from:
  - Dry Cleaner Bags
  - Sandwich Bags
  - Newspaper Sleeves
  - Grocery & Shopping Bags

### Sustainable Supply Chain

- Ensure their vendors are ethically responsible
- Work to reduce environmental impact across supply chain

### The Big Picture

- Work with other companies to create environmentally and socially responsible spaces

# Sustainability highlights

# Trex Heat Mitigation Technology

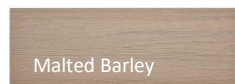

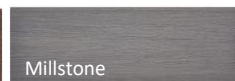

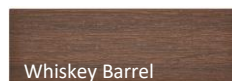

Trex Now offers  
over 30% of our  
colours with  
HEAT  
MITIGATION

Lineage Heat  
Mitigation colours

Enhance Heat  
Mitigation colours

Select Heat  
Mitigation colours

Trex offers SunComfortable boards in Three decking lines that feature heat-mitigating properties engineered into the shell of the boards. This innovative technology reflects UV rays to keep the surface of the deck boards cooler\* than other composite offerings of a similar color. This “cool” feature can be found in our [Trex Transcend® Lineage™](#) line and the newest additions to our [Trex Enhance®](#) collection – Honey Grove (a warm shade with streaks of browns, greys, and onyx black) , Tide Pool (an airy light grey) . Recently we added 3 colours to our Select lineup as well. Color choice, in general, can make a marked difference when it comes to heat retention. Lighter shades of composite decking tend to reflect sunlight better, keeping the surface temperature lower than darker shades.

*\*\*Trex decking with heat-mitigating technology can still get hot to the touch when direct sunlight and high temperatures converge for extended periods of time. We therefore recommend shoes, socks, and pet booties, so that you and yours can enjoy living on your deck as much as we've enjoyed innovating it.*

# TREX for Docks

## Trex® for docks.

PERFORMANCE ENGINEERED® composite decking that stands up to the sun, saltwater, sand and every other punishing possibility the elements have to offer.

### Stands up to salt and fresh water

Decking approved for all water-contact applications

Won't rot, fade, splinter or stain\*

Mold- and mildew-resistant

No sanding or sealing required

Cleans easily with soap and water\*

### Eco-friendly engineered

Made in the USA with 95% recycled materials

Fiberglass-free construction

Safe for the environment and marine life

### 100% submersible

Decking approved for all water-contact applications

Boards can be submerged in water for extended periods of time, including multiple times a day with rising tides

### Waterproof warranties

Backed by 25-, 35- and 50-Year Limited Residential Warranties\*

### Engineered to stay cooler under the sun

SunComfortable™ heat-mitigating technology keeps boards cooler on the hottest of days\*\*

Available in a wide variety of monochromatic and multi-tonal colors, including 9 colors that feature heat-mitigating technology

\*For full details see Limited Warranty at [trex.com/customer-support/for-owners/warranty/](https://trex.com/customer-support/for-owners/warranty/)

\*\*Our SunComfortable™ products with heat-mitigating technology are designed to be cooler than most other composite decking products of a similar color. Although engineered to be more comfortable, they can still get hot to the touch when direct sunlight and high temperatures converge for extended periods of time. On such days, care should be taken.

## Trex Hideaway Universal Clips

50 sq ft

**PRODUCT WARRANTY** – Backed by the same warranty as the Trex boards themselves because this is the Trex-recommended way.

### BENEFITS

Exclusively Trex | Engineered specifically for Trex decks

Effortless Installation | Simplified and quick installation that saves time and labor

Unparalleled Aesthetics | Delivers a seamless topside for a sleek appearance

Hassle-Free Maintenance | Allows for easy board lifting if access is needed

### FEATURES

Provides seamless, fastener-free appearance across entire deck surface.

Glass-filled nylon construction for superior durability.

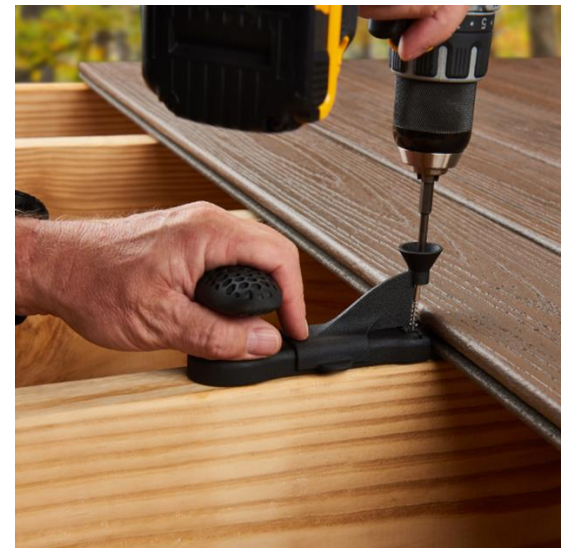

Preset stainless steel screw for ease of installation.

Works with all Trex grooved decking products.

# Trex Hideaway Universal Fastener Installation Tool

- Designed to create a 1 step approach
- Eliminates the need to drill the screw twice
- Saves Time and Improves Efficiency
- Reduce Installation Time by 50%
- Created for the DIY'er and the Professional

# Hideaway Butt Joint Clip

## Product Overview

Solving a common installation issue at butt joints.

### Key Features:

- Simplifies installation by eliminating the need for extra blocking.
- Same trusted glass-filled nylon construction as existing Hideaway Universal Fastener.

### Offering:

- **500 sq ft Bucket Promo:** 2 Butt Joint Clips to be included in DA00002 existing SKU for a limited time.
- **New Stand-Alone SKU:** Pack of 14

**Trex®** Transcend®  
RAILING

Many Design Options

# TREX Transcend Composite Rail

## Mix & Match

No other Trex railing line offers the freedom to mix and match infill and rails like Trex Transcend.

## Timeless Design

Transcend puts every color combination within reach. Get style-specific or eliminate the guesswork with [pre-designed kits](#).

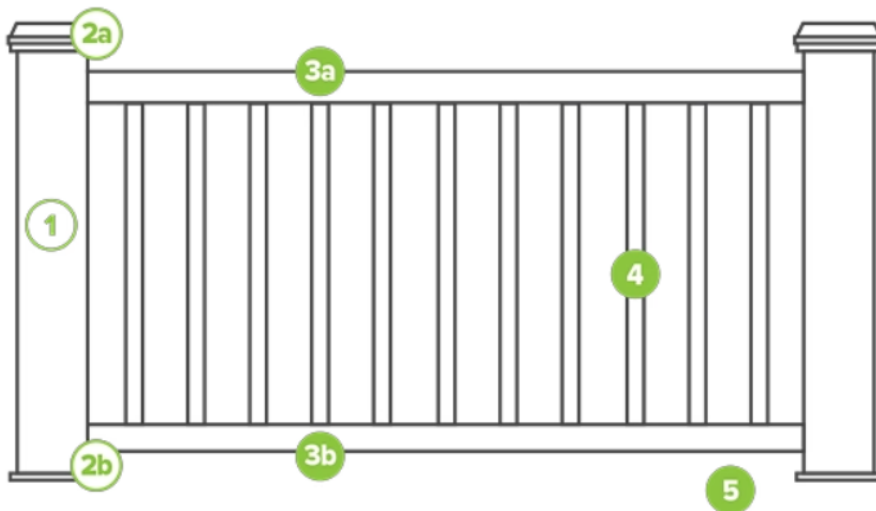

## Durable & Reliable

As strong and sturdy as its namesake decking, this composite railing won't rot, warp, peel or splinter (which trumps sanding row after row of wooden balusters any day), and it never needs painting or staining. Ever.

## Transcend Railing

Elevated aesthetics paired with the highest level of performance. Trex Transcend railing gives you the freedom to mix and match composite rails with composite or aluminum balusters to custom railing look for your outdoor space. Multiple railing options available.

## Multiple colors and options available

## Transcend® Components

Transcend is either a 5-step or 3-step process. Choose Trex post sleeves, caps and skirts (steps 1 & 2). Then choose each component separately for a custom design (steps 3–5).

1. Post Sleeve
- 2a. Post Sleeve Cap
- 2b. Post Sleeve Skirt
- 3a. Top Rail
- 3b. Bottom Rail
4. Balusters
5. Accessory Infill Kit

Transcend also offers a simple, 3-step option if you choose a rail & baluster kit.

# TREX Enhance Steel Rail

## ENTRY-LEVEL STEEL RAILING DELIVERS FUNCTIONAL DESIGN AT A BUDGET-FRIENDLY COST

Easy to install, our black powder-coated steel panels couple perfectly with pre-bracketed posts, making quick work of your railing jobs.

Easy to install, pre-assembled panels take the pain out of installation

**Durable Panels** | The strength of steel allows our panels to withstand harsh weather conditions, insects and weathering

**Beats Wood** | Handily beats wood railing with its easy maintenance

**Aesthetic Appeal** | Pre-assembled panels are compatible with a variety of post options from metal to composite

**Modern, Versatile Design** | Blends with a variety of architectural designs with minimalist panels that optimize views

### AVAILABLE COLOR

Charcoal Black

### WHY TREX

Lower maintenance compared to wood; requires periodic maintenance to delay rust and corrosion

Pre-assembled panels for straightforward installation

# Trex® Outdoor Lighting™

## Deck Lighting

### POST CAP LIGHT

Tucked discreetly under the cap, post cap lights provide a warm downward glow and easy wayfinding.

### DECK RAIL LIGHT

These indirect lights reside directly on the rail post to illuminate the beautiful deck below.

### STAIR RISER LIGHT

Installed into step risers, these lights are durable enough to handle years of passing foot traffic.

### RECESSED DECK LIGHT

These subtle dot lights install flush on the deck boards to efficiently light the way.

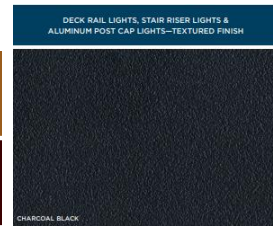

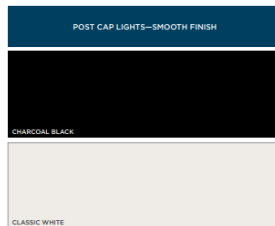

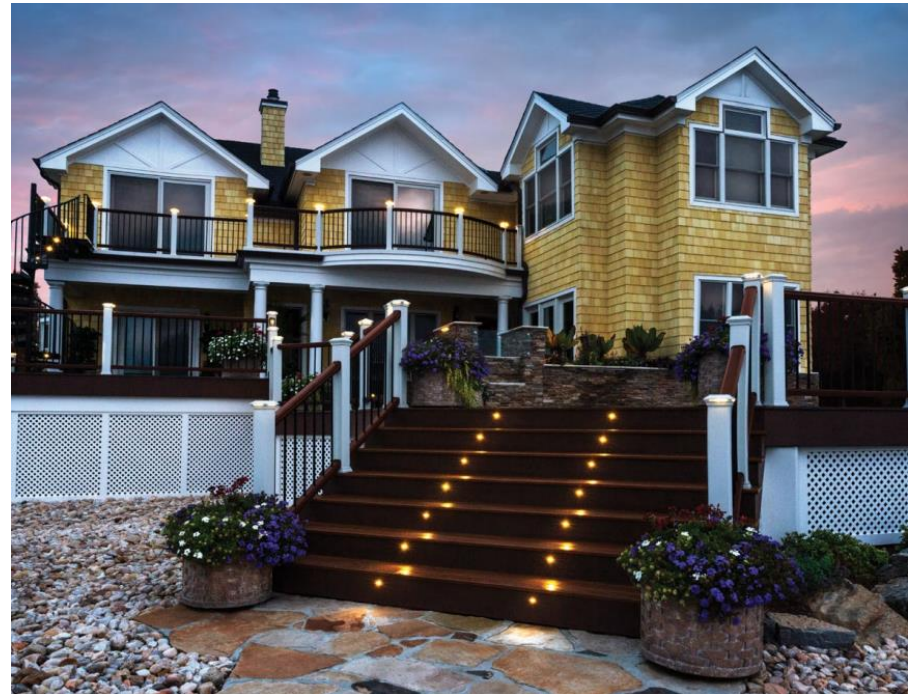

### WEDGE DECK RAIL LIGHT

Sleek and understated, this versatile post lamp can be installed on 2.5-inch aluminum posts as well as composite sleeves.

### ALUMINUM POST CAP LIGHT

Shining in all directions, aluminum post cap lights work seamlessly with Trex Signature® 2.5-inch aluminum posts.

# Trex® Outdoor Lighting™

## DECK LIGHTING FEATURES

### **MAKES DECKS SAFER**

Deck lights provide a soft glow that lights the deck for easier wayfinding. They can be installed into the railing, stair risers or the deck itself.

### **WARM WHITE LIGHT**

At 3000 degrees Kelvin, the light is warm white, adding a touch of coziness to any outdoor deck.

### **75% LESS ENERGY USE**

Deck lights use long-life LEDs from CREE, a worldwide leader in energy-efficient lighting. Compared to incandescent, Trex Deck Lighting uses significantly less energy.

### **24/7 WEATHER-PROOF DURABILITY**

Made with high-performance materials, Trex Deck Lighting can withstand years of tough weather. In fact, deck lights are water and salt air resistant, even in the harshest climates.

### **PROTECTED UNDER 7-YEAR LIMITED WARRANTY**

All deck lights are backed by a limited warranty. Trex covers the LED lights and housing for seven years of use.

### **INSTALLS IN A SNAP**

To avoid splitting wires, you can install deck lighting with the built-in Trex LightHub connection system. There's no wiring or electrical skills needed; just plug them in and enjoy.
